

ACADEMIC CLASSES

It is the desire of the STEM Board to foster engaged students who participate and complete assignments as they are given. **Most students require parents to take an active role to assist their children as needed.** Students missing assignments for 2 consecutive weeks will be required to get caught up prior to returning to class.

Furthermore, students are expected to abide by instructor rules for homework, answer key use, and test taking. Establishing trust among students and adhering to the honor code with parents' help is vital to the success in STEM Academic Classes.

Every class listed on this page will require a considerable amount of weekly homework;

Elementary 4-5th

STEM high school courses are a home school supplemental education tutoring program for motivated, college-bound, high school students. Our goal is to provide a quality, affordable tutorial program, that will encourage students to excel academically and prepare them for college. Most of our classes meet 90 min /1 day a week to prepare students for college rigors while allowing instructors the time needed to cover the material thoroughly. This, also, affords our students the opportunity to build relationships which aids in classroom dynamics. In addition, we offer year-long classes to ensure students are given ample time to master the concepts covered in each class.

Our instructors understand the proficiency level expected at college level and strive to guide students to attain these skills. Students are expected to complete assignments within the time given and at the level expected by the instructors.

Please prayerfully consider all of the above before signing your students up for classes, as space is limited.
